Value Explanations

Low Retail Value — A low retail unit may have extensive wear and tear. Body parts may have dents and blemishes. The buyer can expect to invest in cosmetic and/or mechanical work. This vehicle should be in safe running order. Low retail vehicles usually are not found on dealer lots. **Low retail should not be considered a trade-in value.**

Average Retail Value — An average retail vehicle should be clean and without glaring defects. Tires and glass should be in good condition. The paint should match and have a good finish. The interior should have wear in relation to the age of the vehicle. Carpet and seat upholstery should be clean, and all power options should work. The mileage should be within the acceptable range for the model year.

An Average Retail vehicle on a dealer lot may include a limited warranty or guarantee, and

possibly a current safety and/or emission inspection (where applicable).

Note: Vehicles with low mileage that are in exceptionally good condition can be worth a significantly higher value than the Average Retail price shown.

Note: Add any optional equipment not considered standard on the unit (or otherwise noted).
